Summary

Innovative Developer with 4 years of professional experience, specializing in performance optimization and rapid bug identification and resolution. Proven track record of enhancing application efficiency and ensuring robust, error-free code through meticulous debugging and innovative problem-solving. Skilled in both front-end and back-end development, committed to delivering high-quality software solutions.

Experience

4SELLERS GmbH   September 2020 to Present

Software Developer .NET (Shopsystem)   Leipzig, Germany

🔗 https://4sellers.de/

- Successfully migrated legacy .Net Framework 4.5.2 projects to the latest .Net 8, improving performance and enhancing scalability
- Multiple speed optimizations, including startup improvements that improved times from 2:30 min down to 1.5 seconds
- Runtime type restrictions based on the user privacy cookie preferences, this allows the user to disable certain analysis providers instead of just the entire privacy cookie section
- Internal Incident Handling

NAT Neuberger Anlangen-Technik AG   September 2015 to July 2020

Electrician – Energy and Building Technology   Leipzig, Germany

- Organized and assigned work for multiple big projects, including replacing all A/C units to more efficient and environment friendly ones
- Day-to-day business
- Deputy team leader BMW department
- 3 1/2 years apprenticeship

Education

Oberschule Taucha   August 2008 to July 2014

German "Realschulabschluss"   High School Diploma

Projects

Chatbot Platform

🔗 https://zergoo_bot.zergoo.dev/

A sophisticated livestream chatbot designed for Fansly. The Platform allows creators to set up automated messages, commands, and much more. It also offers stream overlays and integrates seamlessly with third-party providers such as StreamElements, Streamlabs, and Discord. It is utilized by over 600 creators, collectively reaching an audience of more than 500,000 followers.

Ftv (Emote Browser Extension)

A browser extension that enhances Fansly by adding support for Twitch and third-party emote providers. This is another project I dedicate my free time to, and it is currently used by over 600 users.
